

## **Youth Values Focus Groups**

### **Guide to facilitators**

1. **Recap on the project:** Earlier this year you took part in the *Respect* research project which you will remember is all about young people's values, we are interested in what young people believe is right and wrong and why they think the way they do. We are interested in a whole range of issues, and are meeting with young people all across the country and in Northern Ireland. When you completed the questionnaire you gave us your name to say that you would be interested in staying in taking part in the next stage of the research. This group is a follow up to questionnaire.
2. **Role of observer:** We are taping the interview so that we have a true record of what you say, it would be impossible for us to write down everything and we want to make sure that we do justice to the time and effort that you put into the group. Because we are taping it is important that you only speak one at a time. The tape will be treated as confidential.. We take it away with us and the school or parents/carers do not have access to it. We will transcribe the tape, your ideas and comments will be used to write report, but your names will never be attached, so no one will know who said what. No information will be given to parents/carers or teachers unless completely anonymised. Observer (n) will look after the tape and jot down some notes as we go along.
